

Handgun Mounted Light Training

The Firearms Tactics and Training Section offers Handgun Mounted Light Training on **June 27, 2024**, from 0800-1000 hours. This training is for those with a weapon-mounted light but not an optic. You must have the proper holster, **Alien Gear, Rapid Force level 3 Duty Holster V3** to fit your weapon model, or (Safari Land 6360, level 3, if previously purchased) and weapon light to attend this training. **These are not department-issued items, you must buy them at your own cost.**

Please sign up for training through [Cara Vellar](#).

(If you upgrade your duty weapon to the Glock 45 with Optic, the Department will issue you a new holster and a weapon light, this is about a \$300 savings) The Firearms Training and Tactics Section recommends upgrading your Duty Gun and transitioning to the Glock 45 with a Red Dot Optic. Contact the firearms training staff or the Supply unit for information regarding the transition to the new Duty Gun with Optic.
