

Introductory Peregrine Training

Peregrine is a unified platform that dynamically integrates all of your agency's data to create a one stop shop, allowing law enforcement to search, find, and analyze information to find key investigative leads and create needed reports.

Join us for a 1-hour training focused on using Data Search by keyword or entity to explore all agency data sources in a single platform & create Maps to visually see incidents.

This training will have a hands-on portion for attendees to work your real law enforcement scenarios in Peregrine. Workstations will be available when you arrive to the training.

When:

- Monday, September 08
- 10:00-11:00AM
 - 11:30-12:30PM
 - 2:00-3:00PM
 - 4:00-5:00PM
