Wireless Intelligence & Operations Practitioners Symposium (WIOPS)

Inaugural Event

The Wireless Intelligence & Operations Practitioners Symposium (WIOPS) is a professional development forum designed for law enforcement personnel working in wireless and network-based investigations. This practitioner-focused event brings together investigators, analysts, federal specialists, and technical subject-matter experts to strengthen operational understanding of wireless records, lawful intercept processes, and tracking methodologies.

Hosted in partnership with the Kansas City Police Department, the symposium emphasizes real-world investigative application, accuracy considerations, and evolving technologies impacting modern operations.

Who Should Attend

- Law enforcement investigators and analysts
- Electronic surveillance personnel
- Tracking teams
- District Attorney investigators

Primary Focus Areas

- **Historical Record Analysis & Testimony**
 - Interpretation and investigative use of carrier records
 - Analysis of location accuracy
 - How Timing Advance works
 - Cell site coverage analysis
- **Real-time Investigations**
 - GPS ping, pen register, wiretap operations
 - Analysis of GPS ping accuracy
 - CALEA message interpretation
 - Provider content delivery capabilities
- **Cellular Tracking Operations**
 - Workflow and methodologies
 - 5G network considerations
 - Counter CSS applications

Presenters

Presenters are being finalized, but may include:

- Major Cellular Service Providers
- FBI CAST
- NDCAC
- Kansas City PD Career Criminal Task Force
- North Carolina State Bureau of Investigation CAT
- UK Law Enforcement / College of Policing
- Florida Institute of Technology - Wireless Center of Excellence
